

Abdirahman Ahmed

How data is fetched from the user and manipulated on the server-side greatly excites me. My journey with back-end Technologies has proven that my strengths are never limited. I have exploited the Development of Software with a keen focus on user experience, and how a user interacts with data from the front end, up to its manipulation in the back end. Tech-based enterprises as well as being part of startups starting from scratch. Moringa School, being able to offer a multi-disciplinary learning accelerator, interested me because I would get digital and professional skills training, develop sustainable and technical systems to create impact.

EDUCATION

Moringa School, Nairobi — *Certificate*

MAY 2021 - OCTOBER 2021

Studied FullStack development and web development.

Angular framework.

Dagoretti High School, Nairobi — *Certificate*
